

Our Skills & Resources

Our Stake's Emergency Plan has 2 parts. 1 part is the general public part and describes what the stake will be doing. The 2nd part includes processes and procedures, which will include the resources list and is reserved for the Stake Presidency and the Stake Emergency Preparedness Council only. The skills & resources list aids the Stake in knowing what skills, resources and talents members of the community have which could come in handy should an emergency arise. When your block captains come around and provide you with the Ward Plan they'll also ask you about what you'd be willing to do or share with the community in the event of an emergency.
